

## DR. MARCHETTI

Plastic Surgeon

I use Hyaprof dermal fillers in treating both superficial, moderate and deeper indications and I have been really satisfied with the smooth dermal integration and subtle effects. My patients have also been praising a safe procedure and lack of side effects, allowing them to come back to their schedules almost immediately after the procedure.

PATIENT

1

“

This was my first time using a dermal filler and I'm very happy about the results! My lips are now fuller and in better proportions. The injection didn't take long and I was able to come back to my activities almost immediately.

“

I had a treatment with Hyaprof done to get rid of my acne scars and, in general, improve how my skin looks. I feel the results are noticeable only in a good way - it doesn't look like something about my face is completely different, but it seems to be refreshed and evened.

“

I had Hyaprof injected in my jawline and chin to get more definition in this area. I could feel a bit of pain but it wasn't really something very extreme! Definitely less than I remember from my past treatments with other products. I'm very happy how my jawline and chin look now and for sure I will get it done again in a while.

“

I was very surprised that I didn't have any “mini bruises” on my cheeks straight after the injection. This happened to me when I had fillers before so I'm happy I decided to try something new this time.

“

This was my very first time with fillers. I didn't feel any pain even though my friend warned me that this might be an issue. I think I'll repeat it sometime in the future but this time in a different part of my face.

I'm 34 and for the majority of my life I was very insecure with my nose. I was considering the surgical rhinoplasty but the recovery was very stressful for me. When I learned that I can correct my nose with dermal fillers, I decided to give it a try. The whole procedure took 15mins and now I'm super happy about my new nose shape. None of my friends could believe that I had these results without going “under the knife”.
